ICT - E-SAFETY POLICY

INCLUDING CYBER BULLYING, ACCEPTABLE USE AND SOCIAL MEDIA

This policy which is applicable to the whole school and is part of our Safeguarding – Child Protection Procedures.

It is publicly available on the School website and a copy may be obtained from the School Office.

Monitoring and Review: This policy will be subject to continuous monitoring, refinement and audit by Headteacher, Dan Gillespie and Louise Nicholls DSL. The Proprietor will undertake a formal annual review of this policy for the purpose of monitoring and of the efficiency with which the related duties have been discharged, by no later than February 1st 2026 or earlier if significant changes to the systems and arrangements take place, or if legislation, regulatory requirements or best practice guidelines so require.

Signed:

Dan Gillespie Headteacher Daniela Shanly Proprietor

Introduction

The primary purpose of this Policy is to safeguard pupils and staff at Beech Lodge School. It details the actions and behaviour required from pupils and members of staff in order to maintain an e-safe environment and is based on current best practice drawn from a wide range of sources. In accordance with legislative requirements we have a whole school approach to e-safety. Our key message to keep children and young people safe is to be promoted and should be applied to both online and offline behaviours. We filter inappropriate content and teach pupils about staying safe including online harm.

Within our e-safety policy, we have clearly defined roles and responsibilities for online safety as part of the school's wider safeguarding strategy and how this links with our main Safeguarding-Child Protection Policy (please refer to our safeguarding policy cited in related documents). Also see related documents to this E-safety policy.

This policy informs and supports a number of other school policies, including our Safeguarding and Child Protection Policy and our Preventing Extremism and Radicalisation Policy. All staff should read these policies in conjunction with the E-Safety Policy. This is particularly important with regard to the Prevent strategy, as a large portion of cases of radicalisation happen through the online medium. Staff must be vigilant when dealing with such matters and ensure that they observe the procedure for reporting such concerns in line with that laid out in the Child Protection and Preventing Extremism Policies.

Roles and Responsibilities

Our nominated E-Safety Officer is Headteacher Dan Gillespie. He has responsibility for ensuring online safety will be considered an integral part of everyday safeguarding practice. He works alongside the DSL and Deputy DSLs in all matters regarding safeguarding and E-Safety.

Their role will include ensuring:

- Ensuring young people know how to use the internet responsibly and that parents and teachers have the right measures in place to keep children safe from exploitation or radicalisation;
- All staff and volunteers will receive the appropriate training, guidance, time and resources to
 effectively implement online safety policies and procedures;
- Clear and rigorous policies and procedures are to be applied to the use/non-use of personal ICT equipment by all individuals who affect or come into contact with pupils. Such policies and procedures are to include the personal use of work-related resources;
- The E Safety policy is to be implemented, monitored and reviewed regularly, and for ensuring all updates are to be shared with the relevant individuals at the earliest opportunity;
- Monitoring procedures are to be open and transparent;
- Allegations of misuse or known incidents are to be dealt with appropriately and promptly, in line with agreed procedures, and in liaison with other agencies, where applicable;
- Effective online safeguarding support systems are to be put in place, for example, filtering controls, secure networks and virus protection;
- An appropriate level of authorisation is to be given to ICT users. Not all levels of authorisation will be the same – this will depend on, for example, the position, work role and experience of the individual concerned and
- A current record of all staff and pupils who are granted access to school ICT systems is maintained.

Staff Use of IT Systems

Access to the Internet and e-mail is provided to support the curriculum, support school administration and for staff professional development only. Recreational or personal use of the Internet and e-mail system is not permitted except with the prior written approval of the Head. In addition;

- All staff will receive update e-safety training
- All staff must read and confirm by signature that they have read the 'Staff Code of Conduct for ICT' before using any school ICT resource.
- Access to systems should be made by authorised passwords, which must not be made available to any other person.
- The internet can be used actively gather personal information about individuals which may lead to undesirable consequences (e.g. SPAM, fraud, harassment or identity theft).

Pupils Use of IT Systems

Pupils at Beech Lodge School will be given supervised access to our computing facilities and will be provided with access to filtered and other services operating at the School. The promotion of online safety within ICT activities is to be considered essential for meeting the learning and development needs of children and young people. The school will ensure that the use of Internet derived materials by staff and pupils complies with copyright law. Beech Lodge School will help children to

Beech Lodge School is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment. It is our aim that all pupils fulfil their potential

understand the risks posed by adults or young people, who use the internet and social media to bully, groom, abuse or radicalise other people, especially children, young people and vulnerable adults. Internet safety is integral to the school's ICT curriculum and is also embedded in our PSHE and SMSC provision. The latest resources promoted by the DfE can be found at:

- The UK Safer Internet Centre (<u>www.saferinternet.org.uk</u>)
- CEOP's Thinkuknow website (www.thinkuknow.co.uk)

Communicating and educating parents/carers in online safety

Parents will be provided with a copy of the IT User Acceptable Policy, and parents will be asked to sign it on their child's behalf. Beech Lodge School recognises the crucial role that parents play in the protection of their children with regards to online safety. Parents and carers are always welcome to discuss their concerns on e-safety with the school, who can direct them to the support of our E-safety officer if required.

We subscribe to National Online Safety and parents and carers have been encouraged to sign up for it. Each week we send out Online Safety information with the weekly update to parents/carers on Fridays to help them keep up to date on the latest advice and guidance in order to reduce the risk of unsafe interactions online.

Protecting Personal Date:

Personal data will be recorded, processed, transferred and made available according to the Data Protection Act 1998. The school is registered with the Information Commissioners Officer and recognises that if required, data may need to be obtained by relevant parties such as the Police etc.

Radicalisation and the Use of Social Media to encourage extremism

The internet and the use of social media in particular has become a major way to communicate with others, especially young people, which has been provided access for like-minded people to create an online community and confirm extreme beliefs such as extreme ideological views or the use of violence to solve problems. This has led to social media becoming a platform for:

- Intensifying and accelerating the radicalisation of young people;
- Confirming extreme beliefs;
- Accessing to likeminded people where they are not able to do this off-line, creating an online community;
- Normalising abnormal views and behaviours, such as extreme ideological views or the use of violence to solve problems and address grievances.

Beech Lodge School has a number of measures in place to help prevent the use of Social Media for this purpose:

- Web site filtering is in place to help prevent access to terrorist and extremist material and social networking sites such as Facebook, Instagram or Twitter by Pupils.
- Pupils, Parents/Carers and Staff are educated in safe use of Social Media and the risks posed by on-line activity, including from extremist and terrorist groups.

Further details on how social medial is used to promote extremism and radicalisation can be found in guidance from the Department of Education 'How Social Media is Used to Encourage Travel to Syria and Iraq: Briefing Note for Schools'

Reporting of e-Safety issues and concerns including concerns regarding Radicalisation

Beech Lodge School has clear reporting mechanisms in place, available for all users to report issues and concerns. For staff, any concerns regarding E-safety should be made to the E-safety officer who will review the issue and take the appropriate action. For pupils, they are taught to raise any concerns to their class teacher who will then pass this on to the E-safety officer. Complaints of a child protection nature must be dealt with in accordance with our child protection procedure.

Our Designated Safeguarding Lead provides advice and support to other members of staff on protecting children from the risk of on-line radicalisation. Beech Lodge School ensures staff understand what radicalisation and extremism mean and why people may be vulnerable to being drawn into terrorism. We ensure staff have the knowledge and confidence to identify children at risk of being drawn into terrorism, and to challenge extremist ideas which can be used to legitimise terrorism. Staff safeguard and promote the welfare of children and know where and how to refer children and young people for further help as appropriate by making referrals as necessary to Channel.

Assessing Risks:

- We will take all reasonable precautions to prevent access to inappropriate material.
 However, due to the international scale and linked nature of internet content, it is not possible to guarantee that unsuitable material will never appear on a computer connected to the school network. The school cannot accept liability for any material accessed, or any consequences of internet access.
- Emerging technologies, such as mobile phones with internet access (smartphones) are not governed by the school's infrastructure and bypass any and all security and filtering measures that are or could be deployed.
- We will audit ICT use to establish if the E-safety policy is sufficiently robust and that the
 implementation of the e-safety policy is appropriate and effective. This will take place termly
 with our ICT providers and key staff.
- Methods to identify, assess and minimise risks will be reviewed regularly.
- Emerging technologies will be examined by the Head for educational benefit and a risk assessment will be carried out before use in school is allowed.
- Any person not directly employed by the school will not be provided with access to any of the school systems with the exception of filtered Wi-Fi access.

Cyber-Bullying

Cyberbullying is bullying using technology to threaten, embarrass or cause discomfort. Seven categories of cyber-bullying have been identified, however we acknowledge and are vigilant to, other forms of abuse evolving through new technology.

- Text message bullying involves sending unwelcome texts or other similar technologies
- Picture / Video-clip bullying via mobile phone cameras with images or video clips usually sent to other people.

Beech Lodge School is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment. It is our aim that all pupils fulfil their potential

- Phone call bullying via mobile uses silent calls or abusive messages. Sometimes the bullied person's phone is stolen and used to harass others, who then think the phone owner is responsible.
- Email bullying often using a pseudonym for anonymity or using someone else's name to pin the blame on them.
- Online grooming, Chat room and Social Networking Site abuse involves sending menacing or upsetting responses to pupils or young people.
- Bullying through instant messaging (IM) is an internet-based form of bullying where pupils
 and young people are sent unpleasant messages as they conduct real-time conversations
 online;
- Bullying via websites includes the use of defamatory blogs (web logs), personal websites and
 online personal polling sites. There has also been a significant increase in social networking
 sites for young people, which can provide new opportunities for cyber-bullying.

ICT based sexual abuse

The impact on a child of ICT based sexual abuse is similar to that for all sexually abused pupils. However, it has an additional dimension in that there is a visual record of the abuse. ICT based sexual abuse of a child constitutes significant harm through sexual and emotional abuse. Recognition and response means recognising a situation where a child is suffering, or is likely to suffer a degree of physical, sexual and /or emotional harm (through abuse or neglect) which is so harmful that there needs to be compulsory intervention by child protection agencies into the life of the child and their family. All adults (volunteers, staff) working with pupils, adults and families will be alerted to the possibility that:

- A child may already have been/is being abused and the images distributed on the internet or by mobile telephone;
- An adult or older child may be grooming a child for sexual abuse, including involvement in making abusive images. This process can involve the child being shown abusive images;
- An adult or older child may be viewing and downloading child sexual abuse images.

Chat Room Grooming and Offline Abuse

Our staff will need to be continually alert to any suspicious activity involving computers and the internet. Grooming of pupils online is a faster process than usual grooming, and totally anonymous. The abuser develops a 'special' relationship with the child online (often adopting a false identity), which remains a secret to enable an offline meeting to occur in order for the abuser to harm the child.

Taking and Storing Images of children including Mobile Phones (see our related documents)

Beech Lodge School provides an environment in which children, parents and staff are safe from images being recorded. Staff are aware that this is not allowed.

N.B. The word 'camera' in this document refers to any device that may be used to take and store a digital image e.g. mobile phone, tablet, laptop etc.

The School has a Mobile Phone Policy which includes:

Beech Lodge School is committed to safeguarding and promoting the welfare of children and young people and expects all staff and volunteers to share this commitment. It is our aim that all pupils fulfil their potential

- The commitment to keep the children safe;
- How we manage the use of mobile phones at Beech Lodge School taking into consideration staff, pupils on placement, volunteers, other professionals, trustees, visitors and parents / carers;
- How we inform parents/carers, visitors and other professional of our procedures;
- What type of mobile phones will be used on educational visits and learning outside the classrooms;
- The consequences for any breach of this policy;
- Reference to other policies, such as whistleblowing and safeguarding children policies.
